

HIROTM
sliding door system

Regency
A JELD-WEN Company

Offering instant impact as well as cutting-edge innovation, the latest wardrobe system from Regency allows you to add new levels of sophistication, style and value to any room in your home.

With Regency's HIRO wardrobe, the creative options are endless, plus it offers the sought-after flush appearance and none of the rattle and wobble of some other wardrobe sliding door systems on the market.

While many other wardrobe systems leave unsightly gaps and have doors that allow dust and dirt to accumulate and let the doors wobble, bounce off their tracks, and feel anything but secure, the HIRO wardrobe system gives you smooth sliding doors as well as uncompromising style.

The HIRO Sliding Door System has a contemporary wide frame and optional chair rails. Plus the Hiro wardrobe can be completely customised in terms of size and material – with multiple choices of panels that can be grooved, patterned or painted; glass, mirror or veneer.

The Hiro makes a design statement that will reflect your own personal taste and style, just like a custom piece of furniture.
